- o   1.5GHz processor
- o   300 MB – 3 GB[1] available hard disk space per Shoppa user
- o   512 MB available RAM for Shoppa to use
- o   1024 x 768 monitor resolution
- o   Mouse
- o   Keyboard
- o   1 Mbit/s internet connection

Optimal System Requirements:

- o   Windows 7 or later, with the most recent service pack applied
- o   Microsoft .Net 3.5 Framework installed with the most recent service pack applied
- o   Microsoft Visual C++ 2010 Redistributable Package (x86) for 32-bit operating system
- o   Microsoft Visual C++ 2010 Redistributable Package (x86) and (x64) for 64-bit operating system
- o   Multi-Core 2.4GHz or greater processor
- o   1 – 3 GB available hard disk space per Shoppa user
- o   2048 MB available RAM for Shoppa to use
- o   1920 x 1080 monitor resolution
- o   Mouse
- o   Keyboard
- o   4 Mbit/s internet connection

---

[1] Size of required hard drive space increases with amount of customer data

Network Requirements

Shoppa needs a connection to the central system to ensure automatic distribution of manufactured content via internet. Shoppa cannot be run unless a connection to the central system is established.

Minimum configuration:

IP	Port	Protocol
5.178.78.225-233	6910-6919	TCP
5.178.78.225-233	6910-6919	UDP
5.178.78.225-233	80,443	TCP

Recommended configuration:

IP	Port	Protocol
5.178.78.225-254	6910-6919	TCP
5.178.78.225-254	6910-6919	UDP
5.178.78.225-254	80,443	TCP

Installation

The default installation installs Shoppa in the Appdata\Roaming\Shoppa App folder. Program data is stored in the Appdata\Roaming\Shoppa folder by default.
